Bennett & Hastings Publishing. Paperback. Book Condition: New. Paperback. 260 pages. Dimensions: 8.9in. x 6.0in. x 0.8in. The year is 2069 and Jim Murphy thinks he has the world pretty much figured out, as a Knowledge Management Consultant (whatever that is!) muddling through various technology consulting jobs. That is, until his company, SciPop Inc. , assigns him to work a particularly unusual project involving the acquisition of a small backpacking and hiking services business owned by techno-hater Laura Meyers. Jim, however, never works alone. He, like everyone else in the world, is armed with the ultimate technology super-support tool: a personalized, artificially intelligent, holographic Virtual Life form, more commonly known as a Vertal, named Jasper. Just as Jim lives, works and socializes in the physical world; Jasper lives, works, and socializes in the Cybersphere, coexisting and coordinating on behalf of Jim with other Vertals as both navigate the world of the Cybersphere; a 24/7 on-line computer world connecting everyone to everything. Everyone uses it, but in order to use it, you need a Vertal. Somehow, Laura Meyers has learned to exist in the Cybersphere without a Vertal, unfathomable to Jim, Jasper or anyone else at SciPop. But as Jim works the project, he soon discovers there is much more going on in the Cybersphere than SciPop's acquisition of this small, unassuming business when Jasper suddenly goes missing. Jim discovers SciPop has a much bigger and darker plan for Laura's Hikes than just a simple acquisition of one of the few non-technical companies left in existence. Much more. Welcome to CyberLife: A weeklong initiation into the cybercentric universe of techno-biologic symbiosis which is considered by all to be perfectly organized, functional, efficient, and effective. As long as Jim, Laura and Jasper follow the rules and regulations of SciPop. Which, so far, they...
