The classic key to identifying native trees of the Pacific Coast, updated to reflect changes in the names of trees since publication of the first edition. Identifies native trees, and some widely introduced or naturalized species, of the Pacific Coast region, from British Columbia to Baja California. In this edition, Latin names of trees that grow in California conform to the University of California's 1993 Jepson Manual, and more recent name changes. From the Finders series of pocket guides to native plants and animals of the U. S. and Canada; like all plant guides in the series, this book uses a dichotomous key format for accurate identification. This item ships from multiple locations.
